

...a grassroots coalition working toward fundamental changes in the way public education is funded.

Even though it is one of the wealthiest states in the nation, Illinois ranks 49th in state support of K-12 public education. Our current funding system, based in large part on property taxes, creates a tremendous burden for businesses, farms and families while generating and sustaining inequities in education quality for children across our state.

Today, approximately 85% of the public school districts in Illinois are in deficit spending. Districts are forced to sacrifice programs, staff and facilities, lowering the quality of education they can provide.

We have a moral obligation to provide all students with the educational opportunities they need to succeed. This will require a comprehensive restructuring in the way we fund education in our state. Our Coalition is committed to work for real reform in our funding system. We need your help in this awesome, but critical, task. Please join us!

Please list _____me and/or _____my organization as a supporter of the Coalition for School Funding Reform.
